International Journal of **Biological Macromolecules**
Structure, function and interactions

Index to Volume 15 (1993)

Number 1 (February) 1–72
Number 2 (April) 73–136
Number 3 (June) 137–192
Number 4 (August) 193–256
Number 5 (October) 257–320
Number 6 (December) 321–384

Article index

Number 1/February

Thermal treatment of semi-dilute aqueous xanthan solutions yields weak gels with properties resembling hyaluronic acid
H. W. Oviatt and D. A. Brant 3
Molecular modelling of the specific interactions involved in the amylose complexation by fatty acids
M. C. Godet, V. Tran, M. M. Delage and A. Buléon 11
Flexibility in a tetrasaccharide fragment from the high mannose type of N-linked oligosaccharides
A. Imberty, S. Pérez, R. N. Shah, M. Hricovíni and J. P. Carver 17
Conformational features of carrabiose polymers: I. Configurational statistics of κ-carrageenan
R. Urbani, A. Di Blas and A. Cesàro 24
Miniature crystal models of cellulose polymorphs and other carbohydrates
A. D. French, D. P. Miller and A. Aabloo 30
Conformational studies of the backbone (poly-*N*-acetyllactosamine) and the core region sequences of O-linked carbohydrate chains
D. V. Renouf and E. F. Hounsell 37
Steric presentation and recognition of the saccharide chains of glycolipids at the cell surface: Favoured conformations of the saccharide–lipid linkage calculated using molecular mechanics (MM3)
P.-G. Nyholm and I. Pascher 43
Internal motion in carbohydrates as probed by n.m.r. spectroscopy
I. Braccini, V. Michon, C. Hervé du Penhoat, A. Imberty and S. Pérez 52
Conformations of disaccharides by empirical force field calculations. Part V: Conformational maps of β-gentiobiose in an optimized consistent force field
S. B. Engelsen and Kj. Rasmussen 56
Macrocyclization of polysaccharides visualized by electron microscopy
B. T. Stokke, A. Elgsaeter and S. Kitamura 63
Molecular mechanical parameters (MM2 force field) for the $N(sp^3)$-$O(sp^3)$ bond
J. M. J. Tronchet and I. Komaromi 69

Number 2/April

Unfolding and refolding of the NAD^+-dependent isocitrate dehydrogenase from yeast
S. M. Kelly, D. Duncan and N. C. Price 75
Molecular bending and networks in a basement membrane-like collagen: packing in dogfish egg capsule collagen
L. J. Gathercole, E. D. T. Atkins, E. G. Goldbeck-Wood and K. Barnard 81
Construction of nucleosome cores from defined sequence DNA of viral origin
F. Shimron and G. Yagil 89
Refined structure of the aminobenzolamide complex of human carbonic anhydrase II at 1.9 Å and sulphonamide modelling of bovine carbonic anhydrase III
J. Vidgren, A. Svensson and A. Liljas 97
Induction of circular dichroism of symmetrical porphyrins bound to random coil polypeptides in aqueous solutions
T. Nezu and S. Ikeda 101
Periodicity and sequence degeneration in eggcase precursors (vitelline proteins) from *Fasciola hepatica*
L. M. Rzepecki 105
Hemicelluloses as structure regulators in the aggregation of native cellulose
R. H. Atalla, J. M. Hackney, I. Uhlin and N. S. Thompson 109
Hydrodynamic characterization of chitosans varying in degree of acetylation
N. Errington, S. E. Harding, K. M. Vårum and L. Illum 113
Fractal analysis of photolysis of nitrosyl haemoglobin at low temperatures
L. J. El-Jaick and E. Wajnberg 119
Thermodynamic and kinetic studies of competitive inhibition of adenosine deaminase by ring opened analogues of adenine nucleoside
A. A. Moosavi-Movahedi, Y. Rahmani and G. H. Hakimelahi 125
Agarose chain conformation in the sol state by neutron scattering
J.-M. Guenet, A. Brûlet and C. Rochas 131

Number 3/June

B–Z transition of poly(dG-m^5dC).poly(dG-m^5dC) in the presence of basic oligopeptides
H. Votavová and J. Šponar 139

Association complexes between Fe(III) or Cu(II) ions and chitosan derivatives. A thermodynamic and spectroscopic investigation
E. Chiessi, G. Paradossi, M. Venanzi and B. Pispisa 145
Solution and solid-state circular dichroism analyses of a human salivary proline-rich glycoprotein repeating domain and its subfragments
M. Gonzalez, P. M. Loomis and R. E. Loomis 153
Diresidue-monopeptide (DRMP) model for analysis of peptide and protein conformation
V. Geetha and R. Srinivasan 169
Room temperature, low-field ^{13}C-n.m.r. spectra of degraded carrageenans: Part III. Autohydrolysis of a lambda carrageenan and of its alkali-treated derivative
M. D. Noseda and A. S. Cerezo 177
Morphological and structural features of amylose spherocrystals of A-type
W. Helbert, H. Chanzy, V. Planchot, A. Buléon and P. Colonna 183
Recognition of microbial cells by the surface of polymers with oxyethylene units
L. Zhaoxin and M. Kumakura 189

Number 4/August

Differential scanning calorimetric studies of the effects of ions and pH on ribulose 1,5-bisphosphate carboxylase/oxygenase
V. Béghin, H. Bizot, M. Audebrand, J. Lefebvre, D. G. Libouga and R. Douillard 195
Solution properties of the capsular polysaccharide produced by *Klebsiella pneumoniae* SK1
P. Cescutti. S. Paoletti, L. Navarini and A. Flaibani 201
A static and dynamic light scattering study of sharp pectin fractions in aqueous solution
M. Ousalem, J. P. Busnel and T. Nicolai 209
Enzymatic degradation of poly(hydroxyalkanoates) by *Pseudomonas pickettii*
K. Yamada, K. Mukai and Y. Doi 215
Cell growth on immobilized cell growth factor: 5. Interaction of immobilized transferrin with fibroblast cells
S. Q. Liu, Y. Ito and Y. Imanishi 221
Determination of the unfrozen water content of maximally freeze-concentrated carbohydrate solutions
R. H. M. Hatley and A. Mant 227
Reactivity of 42 disulfides with thiol group of human haemoglobin and human serum albumin
J.-P. Mahieu, N.-M. Gosselet, B. Sebille, M.-C. Garel and Y. Beuzard 233
Studies on chitosan: 6. Relationship between *N*-acetyl group distribution pattern and chitinase digestibility of partially *N*-acetylated chitosans
S. Aiba 241
Relative binding free energy calculations of DNA to daunomycin and its 13-dihydro analogue
S. Yunyu, Z. Huimin and W. Cunxin 247
Biosynthesis of polyesters from various amino acids by *Alcaligenes eutrophus*
M. Fujita, K. Nakamura, H. Kuroki, N. Yoshie and Y. Inoue 253

Number 5/October

Nuclease properties of two putative zinc finger peptides
M. Giel, G. Ślósarek, J. Barciszewski, P. Rekowski and G. Kupryszewski 259
Kinetics of collagen denaturation in mammalian lens capsules studied by differential scanning calorimetry
C. A. Miles 265
Heat denaturation of metHb and HbNO: e.p.r. evidence for the existence of a new hemichrome
O. C. Alves and E. Wajnberg 273
Characterization of chitosan. Influence of ionic strength and degree of acetylation on chain expansion
M. Rinaudo, M. Milas and P. L. Dung 281
Biosynthesis of poly(3-hydroxy-alkanoates) in *Pseudomonas aeruginosa* AO-232 from ^{13}C-labelled acetate and propionate
Y. Saito and Y. Doi 287
Temperature-induced folding changes of β-lactoglobulin in hydro-methanolic solutions
E. Dufour and T. Haertlé 293
In vitro formation and aggregation of heterotypic collagen I and III fibrils
H. Notbohm, S. Mosler, P. K. Müller and J. Brinckmann 299
Solid-state studies on synthetic fragments and analogues of elastin
C. Megret, A. Lamure, M. Th. Pieraggi, C. Lacabanne, V. Guantieri and A. M. Tamburro 305
Improved visualization of folded collagen α-chains by ultra-rapid freezing
R. M. Abeysekera, A. W. Robards, A. B. Hodgson and D. M. Goodall 313
Does the increased hydrophobicity of the interior and hydrophilicity of the exterior of an enzyme structure reflect its increased thermostability?
Š. Janeček 317

Number 6/December

Structural difference between polymerized and non-polymerized fragment X, obtained by plasmin digest of fibrinogen
H. Sato and J. K. Swadesh 323
In vitro chiral nematic ordering of chitin crystallites
J.-F. Revol and R. H. Marchessault 329
Interaction of glucose oxidase with ionic surfactants: a micro-calorimetric study
M. R. Housaindokht, A. A. Moosavi-Movahedi, J. Moghadasi and M. N. Jones 337
Interaction between sodium n-undecyl sulfate and insulin
G. Prieto, J. M. del Río, M. I. Paz Andrade, F. Sarmiento and M. N. Jones 343
Visualization of the adsorption of a bacterial endo-β-1,4-glucanase and its isolated cellulose-binding domain to crystalline cellulose
N. R. Gilkes, D. G. Kilburn, R. C. Miller, Jr, R. A. J. Warren, J. Sugiyama, H. Chanzy and B. Henrissat 347
Transverse dipoles added to DNA chains by drug binding can induce inversion of the long-range chirality of DNA condensates
B. Samorí, M. A. Osipov, I. Domini and A. Bartolini 353
Kinetics and mechanism of heterogeneous hydrolysis of poly[(R)-3-hydroxybutyrate] film by PHA depolymerases
K. Mukai, K. Yamada and Y. Doi 361
E.s.r. study of the conformational transition of spin-labelled xanthan gum in aqueous solution
S. Takigami, M. Shimada, P. A. Williams and G. O. Phillips 367
